

Specialist Termite Control – Operating Procedure During Stage 4 Lockdown:

Dear valued client,

As a member of the Pest Control Industry we are permitted under the Victorian Government Covid restrictions to provide essential works during the Stage 4 lockdown. Some less essential services will be limited or postponed, but we will be conducting some maintenance work where there is no direct contact with clients. Additionally, some services will be provided where the risk of termite infestation is deemed 'high' where this can be provided safely.

Specialist Termite Control will be keeping abreast of any changes to in advice by DHHS.

Currently we are practicing following health and safety procedures:

- Four-square metres provided per person in an enclosed space.
- The ceasing of handshaking as a greeting.

- Deferring site work where there are large numbers of people.
- Deferring work that is deemed moderate to low risk.
- Promoting good hand and sneeze/cough hygiene and providing hand sanitisers for all staff.
- Regularly disinfecting touch points on our vehicles and tools.
- Wearing of surgical gloves when entering a home.
- The wearing of a mask at all times when inside homes and outside. Masks may be removed for strenuous work outside.

How can you help?

You can help us by letting us know if you have

- Been in contact with a confirmed case of CORVID 19.
- Have cold or flu like symptoms.
- Abide by social distancing and avoid being within the same room as our staff if they are required to come inside.

Thank you for your cooperation and support while we negotiate this difficult time.

Stay safe,

Termite Managers
